## KODAK VISION3 250D Color Negative Film 5207 / 7207

Kodak announces a medium-speed, daylight-balanced emulsion — providing filmmakers a tool to add to their creative palettes. KODAK VISION3 Film technology, VISION3 250D Film offers outstanding performance in the extremes of exposure — including increased highlight latitude, so you can move faster on the set and pull more detail out of the highlights in post. You'll also see reduced grain in shadows, so you can push the boundaries of underexposure and still get outstanding results. What's more, VISION3 250D Film works seamlessly in digital post, so you can employ a workflow that combines the best of both worlds for exceptional efficiency and image quality. Combine all that with film's amazing resolution and proven, long-term archival capabilities and you've got a state-of-the-art image capture medium.
