

Introducing New Gold Colored Metal Film Cans

KODAK is pleased to announce the availability of epoxy coated Gold Colored Metal Film Cans to be used for transportation and storage of motion picture film. Testing has shown this epoxy based coating to be more durable than the vinyl based coating used on the currently available gray colored Metal Film Cans. Independent testing also indicates that the epoxy coated metal cans are acceptable for archival use. These new cans have not been tested for food packaging or other non-film uses. The new Gold Colored Metal Film Cans will be phased in on a stock turnover basis with the current catalog numbers being replaced with new catalog numbers listed below.

The following changes will be reflected in the next update of the KODAK Motion Picture Products Price Catalog.

Old CAT No.	NEW Replacement CAT No.	Product Description	Min Order Qty	Net Unit Price Qty	Net Per Sales Unit
