# **KODAK** Onsite Consulting Services Clean Room Technology

**Catalog Number: 129 9411**

## **Purpose**

This service provides an onsite contamination control assessment of lab operations, environments, and film handling procedures to identify sources of airborne particle contamination that can cause spot defects on products.

## **Benefits**

Reduction of spot defects on film.

## **Kodak Deliverables**

A Kodak contamination control technical specialist will walk through and evaluate the process flow of the lab. At each process step, the specialist will measure airborne particles and surface contamination to determine the level of cleanliness. During the walkthrough, the specialist will recommend remedies to any problems identified so you can begin an improvement plan immediately. The specialist will also provide a detailed report within 2 weeks that includes solutions for your specific problems.

Estimated timeline for service to be completed:

- 2 - 3 days for on-site assessment
- 2 weeks for detailed report

## **Ordering Information**

Cost to be determined based on the Terms and Conditions stated in the Service Agreement and agreed upon scope of work. Contact your local Customer Service Representative or Kodak office for price and availability in your area.
