# **KODAK** Sensitivity Assessment

**Catalog Number: 404 9789**

## **Purpose**

Kodak will perform a sensitivity assessment to determine how motion picture film will react sensitometrically to a processing solution and/or chemical constituent that may contain contaminants.

## **Benefits**

- Sensitometric verification under controlled conditions
- Identification of sensitometric deviations
- Evaluation of chemical constituent or photo-processing solution in motion picture processes to assess suitability

## **Recommended Procedures**

After contacting Kodak, the customer must send properly identified sample(s), in recommended shipping containers, to the agreed-upon Kodak facility.

## **Kodak Deliverables**

Kodak will provide a written report of the processing test. This may include full sensitometric curves and chemical analytical results.

The service will be completed within 5 business days of receipt of sample unless otherwise stated.

## **Ordering Information**

Please contact your local Customer Service Representative or Kodak office for price and availability in your area.
